

# ANIL GOUD GUNDA

*Business Analyst | Power Platform Delivery | Finance & Operations Domain*

+91 9618789987 | anilgoud.gunda@gmail.com | Hyderabad, India

## PROFESSIONAL SUMMARY

Business Analyst and Power Platform delivery lead with 10+ years of experience spanning financial operations and enterprise application delivery. Over 5 years leading end-to-end Power Apps (Canvas & Model-driven) delivery at Deloitte USI — from stakeholder discovery and requirements through Agile execution and go-live. Prior background in financial process operations (reconciliation, journal entries, GR/IR, statutory audit) brings practical domain depth to finance and operations-focused engagements. Early, hands-on adopter of AI coding assistants (Claude Code, Copilot Studio) to accelerate documentation, internal tooling, and test-cycle turnaround.

## CORE COMPETENCIES

**Requirements & Discovery**
Stakeholder workshops, BRD/FRD/PRD authoring, user stories & acceptance criteria, BPMN process mapping, requirements traceability, UAT coordination

**Agile Product Delivery**
Backlog ownership & prioritization, sprint planning/execution, OKR/KPI definition, MVP scoping, cross-functional coordination

**Power Platform**
Power Apps (Canvas & Model-driven), Power Automate, Dataverse schema design, Copilot Studio, Power BI reporting

**Finance & Operations Domain**
Reconciliation, journal entries & amortization, GR/IR & vendor processing, statutory/internal audit, SOP design

**AI-Augmented Delivery**
Using Claude Code and Copilot Studio to accelerate documentation, internal tooling, and test-script maintenance; practical prompt engineering for delivery workflows

## EDUCATION & CERTIFICATIONS

**PGP in Data Science & Generative AI** — IIIT Bangalore, 2024–2025

**Bachelor of Commerce (B.Com)** — Kakatiya University

**Certifications:** Microsoft Fabric Analytics Engineer (DP-600) · Azure Data Fundamentals (DP-900) · Databricks Lakehouse Fundamentals · Microsoft Power Up Program

## KEY STRENGTHS

**End-to-End Ownership**
Requirements to release — a single thread of accountability across the full delivery lifecycle.

**Stakeholder Bridge**
Translate technical complexity into business language and back — so both sides agree on what's being built.

**Power Apps Depth**
Hands-on, end-to-end mastery Power apps, Power Automate, and Copilot Studio as one ecosystem.

## PROFESSIONAL EXPERIENCE

**Assistant Manager | Deloitte USI** *Feb 2020 – Present | Hyderabad*

- Lead discovery workshops with stakeholders to map current-state processes, capture pain points, and define measurable outcomes before solution design begins
- Author BRDs, FRDs, and PRDs with complete functional specifications; translate business needs into user stories, wireframes, and information-architecture diagrams
- Maintain end-to-end requirements traceability from initial ask through UAT sign-off
- Own the backlog and run Agile ceremonies (sprint planning, standups, retrospectives) for a Power Apps delivery team
- Define OKRs/KPIs and report delivery progress and adoption to leadership using Power BI
- Build and deliver Power Apps solutions end-to-end (Canvas & Model-driven) — Dataverse schema design, UI, Power Automate integration, and deployment
- Use Claude Code (an AI coding assistant) and Copilot Studio to build internal automation tooling — documentation generation, delivery scaffolding, and test-script assistance — that measurably shortened internal delivery cycles
- Mentor junior business analysts; document and share reusable delivery templates and workflow playbooks now used by other delivery teams

## PREVIOUS EXPERIENCE

**Senior Process Analyst | Broadridge Financial Solutions** *Oct 2017 – Jan 2020 | Hyderabad*

- Led amortization schedules and journal entry processes for financial instruments across multiple portfolios
- Automated month-end reconciliation workflows, reducing processing time by 40%; designed SOPs adopted across the operations team

**Senior Process Executive | Cognizant Technology Solutions** *Jun 2016 – Oct 2017 | Hyderabad*

- Performed bank reconciliation and intercompany accounting for a Fortune 500 client
- Built Excel VBA macros and Power Query workflows that automated 70% of manual data processing; served as SME for complex reconciliation scenarios

**Process Associate | Genpact** *Dec 2014 – Jun 2016 | Hyderabad*

- Processed vendor invoices, GR/IR clearing, and payment runs in SAP for a global manufacturing client
- Executed vendor reconciliation and aging analysis, resolving discrepancies within SLA

**Audit Executive | N. Shiva Prasad & Co.** *May 2013 – Sept 2014 | Hyderabad*

- Conducted statutory and internal audits for SME clients across manufacturing and services sectors; assessed financial risk and verified compliance with accounting standards

## SELECTED DELIVERY HIGHLIGHTS

### Account Planning Intelligence Platform

Delivered a Power Apps Canvas application consolidating fragmented data across 300+ internal accounts. Ran requirements workshops, designed the information architecture, and managed a 6-sprint Agile backlog. Compressed a 1.5-month manual reporting cycle to 20 days.

### AI & Automation Discovery Framework

Built a structured evaluation framework (rubrics, decision trees, prompt templates) to help teams assess which processes suited AI vs. traditional automation vs. manual handling. Adopted as standard practice across 4 practice areas, cutting discovery-phase duration by ~60%.

### Delivery Accelerator Toolkit

Used Claude Code to build an internal toolkit that scaffolds requirements documentation, mockups, and Power Apps configuration from approved specs. Cut internal app-scaffolding time from 5–6 weeks to under 1 week; adopted by 3 delivery teams.

### Test Cycle Automation

Paired Playwright with Claude Code CLI and Copilot Studio to speed up regression test authoring and maintenance, cutting the regression cycle from 3 days to 4 hours.
